

EEICT 2005

Obsah

Předmluva

Bakalářské projekty

Elektronika

Doseděl, M.

Electronic Velocity Measurement of Gases with Thermal Anemometers

Hubík, V.

Application of the USB Module in Peripheral Systems

Jeřábek, J.

New Active Element and Its Application in Current-mode Filters Design

Kulig, R.

Dual Channels Stopwatches

Lacman, P.

Interpolation Method Voxel Nearest Neighbour for Reconstruction of 3D Ultrasound Data

Povalač, A.

Implementing Dallas 1-Wire Slave on AVR

Smejkal, V.

Digital Low-frequency Amplifier - Class T

Valenta, V.

Error Performance of BPSK and QPSK in Satellite Communications

Kybernetika a automatizace

Křížek, T.

AC Induction Machine Models

Mikulčík, A.

Matrix Codes

Mikulka, J.

Communication protocol IEC 870-5-101

Silnoproudá elektrotechnika a elektroenergetika

Huzlík, R.

Use of Autodesk Inventor in Design of Electrical Machines and Apparatus

Těžký, J.

Surge Voltage Protectors and Their Influence on Supply Network

Tůma, J.

Design of Test Bench for Circuit Breaker BD250

Teoretická elektrotechnika

Štumpf, M.

Finding a Resonance Frequency of a Special Type of Cavity Resonator

Mikroelektronika a technologie

Cichy, J.

Influence of the Negative Active Mass Additives on Lifetime, Inner Resistance and Other Parameters of the Lead-Acid Accumulator

Krzák, T.

Controlling and Regulating by Electrical Power Network 230 V

Novák, P.

Technique of Conductivity Measurements

Opletal, P.

The Inspection of Solder Joint with Sonic Way

Řezníček, M.

Proces Energy Balance Monitoring

Smolka, R., Švéda, V.

Software for Communication between Bluetooth Devices

Šulc, J.

Some Aspects Influencing Output Response of Amperometric Sensor

Švéda, V., Smolka, R.

Hardware for Bluetooth Measuring Device

Vávra, J.

D/A Converter for the DMX 512 Protocol

Informační systémy

Boháček, P., Řezníček, I.

Automatization of Testing Processes

Fapšo, M.

Search Engine for Access to Information from Speech Recognition

Ježdík, M.

Internet Information System for School Canteen

Konečný, P.

Processing on the CHM Format

Kopečný, J.

Proxy Server Accelerating Internet Connection

Krajíček, J.

Analysis of Natural Languages

Letko, Z.

Information System of Student Union FIT BUT

Machata, P.

The Design of a Combined Parser

Martinský, O.

DEV - Content Management System for Web Portals

Pluháček, D.

Finite Transducer with Multiple Read Heads

Zuzáňák, J.

Combinated Syntactic Analyze

Žídek, M., Vlach, P.

Information System of Travel Agency

Grafika a multimédia**Bohovic, R.**

Design of Data Structures for GIS Representing Historical Events

Počítačové systémy**Mikušek, P.**

Design and Implementation of Processing Unit for Packet Analysis

Pazdera, J.

Priority Queues System for IPv6 Router

Tobola, J.

Fast Pattern Matching Using FPGA and TCAM

Žádník, M.

Novel Architecture of NetFlow Adapter

Intelligentní systémy**Bátrla, T.**

Development of Cellular Automata

Magisterské projekty**Elektronika****Bobula, M.**

Automatic Measurement Application for Car Use TV Tuner Performances

Čížek, M.

Digitalization of Signal from Blood Flow Detector

Duda, R.

Software for Bay Level Calibration of BTS

Gleissner, F.

Mobile Data Networks Interference Analysis

Chmela, P.

The Design of Horn Antennas in the Program FEMLAB

Minarčík, M.,	Universal Voltage Conveyor and Its Applications
Sapák, J.	True RMS DC + AC Converters
Vitikáč, M.	Measurement of Vibrations with Position Sensitive Detector

Telekomunikace

Číka, P.	BCH Encoder and Decoder
Mikulka, J.	Bluetooth and WLAN Systems Coexistence

Kybernetika a automatizace

Dvorská, J.	Proximity Laser Scanners Data Segmentation
Kříž, P.	Process Control with Neural Networks in PC-B&R Environment
Malík, K.	Predictive Controllers
Němec, V.	Summer Bobsleigh Track Monitoring

Silnoprúdová elektrotechnika a elektroenergetika

Nevrkla, P.	Using of MATLAB to Solve Specific Tasks in Electric Distribution Systems
Paar, M.	Optimization of Parallel Compensation in MV Distribution Network

Teoretická elektrotechnika

Hrdý, J.	Solving Problems in Electronics Using Maple
Kubičková, K.	Analysis Properties in Solar Cells by Low and Very Low Radiation Intensity
Vojtek, T.	Spectral Analysis of Air Ions Concentration

Mikroelektronika a technologie

Barath, P.

Fuel Cell with Ion Exchange Filter Membrane

Juris, Z.

Interferometry on a Thin Layer

Opletal, T.

Switched Currents Algorithmic AD Converter

Pavlík, M.

Laboratory Switched Power Supply

Prchal, L.

Process Analysis and Specification of Critical Workplaces

Ševčík, R.

Testing and Measuring Covers Materials in Solar Panels

Vaněk, J.

Flux Method and Heterojunction Transistors

Informační systémy

Doležel, V.

HTML to WML Convertor

Fiedler, Z.

Critical Requirements of the Information System Design

Horní, T.

Deep Top-Down Parsers

Chmelař, P.

Mining Association Rules from Texture Databases

Jurka, P.

Mining Quantitative Association Rules in Large Relation Tables

Kunc, M.

Parsing Based on Pushdown Transducers

Majtán, J.

A Parsing Method Based on a Set of Grammars

Novosad, M.

WAP Convertor

Obrdlík, L.

Automata with Deep Pushdowns

Polák, V.

Transparent Integration MS SQL Databases into Oracle

Schönecker, R.

Linear n-parallel Automata

Slaný, K.

Parallel Language Operations - Controlled Text Insertion

Techet, J.

Canonical Scattered Context Generators of Sentences with Their Parses

Vintera, J.	BUT Central Contract Register
Weiss, P.	Relational Database System

Grafika a multimédia

Bajer, J.	Non-linear Filtration of Images
Blaha, P.	Panoramic Picture from Video Sequence
Dvořák, T.	Construction of Height Map from Contour Lines in Scanned Touristic Map
Filip, F.	Graphical User Interface in 3D
Kontár, S.	Real-time Fluid Simulation
Marek, L.	Graphic Representation of Historical Data
Šmíd, T.	Recognition of Car Type from Image
Venera, J.	Augmentation of 3D Scene

Počítačové systémy

Bečica, T.	Cluster Distributed GCC
Gajda, Z.	Evolutionary Design of Fractal Images
Holenda, S.	External Device Control using PDA
Jakšík, O.	Using Genetic Programming in Median Search
Vašíček, Z.	Evolutionary Design of Digital Circuits at the Gate Level

Inteligentní systémy

Bubeník, J.	Comparison of Agent's Planning Approaches in Non-deterministic Environment ..
Kaštovský, L.	Communication Protocols for Multi-agent Auctions
Michel, R.	Teardrop DoS Attack

Ondruš, J.	
Analysis of SIM Cards for GSM Phones	
Šopík, B.	
IPSec	
Štěpán, M.	
Optimization of Robot's Trajectory	
Walek, T.	
Recognition of Microorganisms and Searching for the Species	
Zimola, O.	
Differential Cryptanalysis
